PREFACE

Regional Statistics, Australian Capital Territory presents a summary of the latest available key statistics, at the time of preparation, for the separate Statistical Local Areas of the ACT. It replaces the previously known publication *Canberra Statistical Area Summary*.

Table 1 contains data at the Statistical Subdivision level. The Statistical Subdivisions of the ACT equate with the town centre districts.

Tables 2 to 8 contain Statistical Local Area data arranged alphabetically for each of the subdivisions of Canberra. The Statistical Local Areas (SLAs) equate to suburbs in the ACT. A map, indicating the area of the Canberra Statistical Division each subdivision comprises, precedes the data.

Page 35 shows a map of and key to all the SLAs of the ACT.

The data contained in this publication represents only a sample of the full range of statistics available from the ABS. For further information about ABS statistics and services refer to the back cover of this publication.

MAIN FEATURES

Estimated Resident Population

The ACT estimated resident population for 1994 was 300,912, an increase of 2,746 (0.9%) on the previous year. Annual population growth predominantly occurred in the subdivisions of Outer Canberra and Tuggeranong, where the population increased by 52.1 per cent and 2.9 per cent, respectively. The Outer Canberra increase was due to the growth in Palmerston and the establishment of Ngunnawal and Nicholls.

Tuggeranong SSD continued to have the highest proportion of 0-4 year olds (40.8%). A large proportion were in the suburbs of Kambah, Calwell and Chisholm, 1,339, 886 and 868 respectively. Belconnen SSD had the second highest proportion for this age group (27.3%).

Tuggeranong SSD also had the highest proportion of 5-14 year olds (37.0%). Kambah, Wanniasa, Chisholm and Monash had the highest proportion of 5-14 year olds with 3,388, 2,071, 1,407 and 1,260 respectively.

Over 35 per cent of people aged between 15-19 years lived in the Belconnen SSD; namely in Kaleen (9.0%), Evatt (7.1%) and Macgregor (6.1%). Belconnen SSD had the highest concentration of this age group for the Territory.

People aged between 20-54 years formed the largest population group (55.9%) in the ACT. Of these, the highest proportion (30.0%) lived in the Belconnen SSD, particularly in the suburbs of Kaleen (10.1%), Evatt (7.2%) and Florey (6.4%). The suburbs of Kambah and Wanniasa, of the Tuggeranong SSD, had the highest number of 20-54 year olds in the ACT, 10,482 and 5,271 respectively.

Almost 43 per cent of 65 years or over resided in the Canberra Central SSD, with a further 28.0 per cent of 55-64 year age group. This was the highest proportion for all ACT subdivisions. The highest concentrations of people aged 55 or over living in Canberra Central were found in Narrabundah (1,349) and Ainslie (1,167).

Vital statistics

In the ACT in 1993, there were slightly more males than females, 149,685 (50.2% of total ACT population) to 148,481 (49.8% of total ACT population).

Similarly, there was a marginally higher birth rate of males to females. Of the 4,409 births registered in 1993, 2,234 (50.7%) were males and 2,175 (49.3%) were females. Tuggeranong SSD recorded the greatest number of births in the ACT, 1,781 births were registered which represented 40.4 per cent of total ACT births. Tuggeranong SSD also had the highest number of infant deaths of all ACT subdivisions, with a total of 11 deaths (57.9%) were recorded.

In 1993, 1,105 deaths were recorded for the ACT. Of these 629 (56.9%) were males and 476 (43.1%) were females. Canberra Central had the highest number of deaths for all ACT subdivisions. A total of 456 deaths were recorded for Canberra Central, which represented 41.3 per cent for the Territory.

Business Register

A total of 10,755 businesses were registered on the ABS Business Register in March 1994. The majority of businesses were located in the Canberra Central SSD with 5,138 businesses registered (47.8%), followed by Belconnen with 1,983 (18.4%). Tuggeranong and Woden Valley were comparable with 1,257 (11.7%) and 1,250 (11.6%) respectively.

A total of 6,642 ACT businesses (61.8%) had an employment size of less than 5 staff and 2,120 (19.7%) had an employment size between 5-9 staff.

Of the 6,642 businesses employing less than 5 staff, 2,906 (43.8%) were located in Canberra Central subdivision, 1,320 (19.9%) in Belconnen and 928 (14.0%) in Tuggeranong. Of the 2,120 businesses employing between 5 and 9 staff, 1,128 (53.2%) were located in Canberra Central, 366 (17.3%) in Belconnen and 257 (12.1%) in Woden Valley.

The most common legal organisation identified in the ACT was companies (52.7%), followed by sole proprietors (15.2%) and partnerships (10.2%). All three types of legal organisations were in the private sector, which accounted for 91.5 per cent of registered businesses in the ACT. The remaining 8.5 per cent of businesses were in the public sector. Territory government accounted for 51.7 per cent of businesses in the public sector for the ACT, while the Federal government accounted for 48.1 per cent. Over 51 per cent of companies were located in Canberra Central, 16.8 per cent in Belconnen, and 11.0 per cent in Tuggeranong.

Majority of businesses for each legal organisation were located in Canberra Central (47.7%) and Belconnen (18.5%). Canberra Central comprise 56.7 per cent of companies, 12.5 per cent of sole proprietors and 8.1 per cent of partnerships. In Belconnen, there were 48.1 per cent of companies, 18.8 per cent of sole proprietors and 11.9 per cent of partnerships.

Tourist Accommodation

During 1994, total takings from all tourist accommodation in the ACT was \$87.1 million. Hotels, motels and guest houses with facilities were the major revenue raiser with \$72.0 million, contributing 82.7 per cent to the total revenue. Holiday flats and units followed with \$12.2 million and Caravan parks with \$2.9 million.

Average room and unit occupancy rates for Hotels, motels and guest houses was 64.9 per cent. Holiday flats and units had a similar occupancy rate of 67.2 per cent. Caravan parks occupancy rates were much lower at 41.4 per cent.

Labour Market

In the twelve month period December 1993 to December 1994, ACT labour force decreased by 6,381 (3.7%) from 172,699 to 166,318. In percentage terms, the largest decrease was recorded in Outer Canberra SSD, down 29.5 per cent from 1,989 to 1,402. Weston Creek SSD followed with a 6.1 per cent decrease. The SSD which recorded the highest increase was ACT Balance, up 91.7 per cent from 206 to 395.

In December 1994, the unemployment rate for ACT Balance SSD was the highest recorded for all ACT subdivisions at 12.7 per cent, followed by Canberra Central at 9.3 per cent and Outer Canberra at 8.5 per cent. Weston Creek recorded the lowest unemployment rate for all ACT subdivision, at 4.7 per cent.

Building Approvals

During 1994, 3,849 buildings were approved in the ACT to the value of \$758.1 million. The number of dwelling units created was 3,670. Tuggeranong continued to have

the highest percentage of building approvals at 28.8 per cent, followed by 27.6 per cent for Outer Canberra and 18.2 per cent for Canberra Central. In value terms, Canberra Central provided the largest contribution of \$302.6 million, Tuggeranong followed with \$136.5 million and Outer Canberra, \$130.5 million.

Education

In February 1995, there were 4,282 enrolments for 80 ACT pre-schools, which represents an increase of 2.1 per cent from 1993. Tuggeranong had the highest pre-school enrolment with 1,746 enrolments (40.8%), followed by Belconnen with 1,067 enrolments (24.9%). Two additional pre-schools were established in 1995 and were located in Conder and Palmerston.

In 1995, total number of students enrolled in ACT schools increased from 61,549 to 61,666 (0.2%). The increase was identified in non-government schools, up from 21,096 to 21,198. Government school enrolments remained relatively unchanged at 40,468. Belconnen government schools recorded the largest decrease in enrolments, down from 12,729 to 12,218 (4.0%). Increases were recorded in Tuggeranong, up from 11,857 to 12,332 (4.0%) and Outer Canberra, up from 158 to 487 (208.2%). The significant increase for Outer Canberra is attributed to the growth in Palmerston (separate figures were previously unavailable).

CANBERRA CENTRAL STATISTICAL SUBDIVISION

- In 1994, the overall density of the population in the Canberra Central SSD declined by 1.0 per cent, down from 806.5 persons per square metre to 798.5. The largest population decreases were recorded in Campbell (4.4%), Hackett (2.9%) and Reid (2.7%). City had the highest population increase of 58.9 per cent.
- In 1993, male deaths exceeded female deaths by 11.4 per cent. The suburbs of Narrabundah and Ainslie recorded the greatest number of deaths, 57 and 56, respectively.
- The unemployment rate remained relative stable at 9.3 per cent, down 0.3 percentage points from December the previous year. Significant falls were recorded for City (3.1 percentage points) and Acton (1.3 percentage points). Fyshwick had the largest increase of 3.9 percentage points.
- Barton and City recorded the largest values in building approvals, \$96.4 million and \$48.4 million, respectively. The major building activity in Canberra Central occurred in Griffith (184 dwelling units created) and Braddon (155).
- Canberra Central accounted for 70 per cent of students attending special schools, including the only non-government school in the ACT which is located in Lyneham.

Statistical Divisions and Subdivisions
Australian Capital Territory
as at 30 June 1993

BELCONNEN STATISTICAL SUBDIVISION

- In 1994, the Belconnen SSD population declined by 0.9 per cent. Of the 24 suburbs located in Belconnen, 19 recorded decreases. In percentage terms, the largest decreases were recorded in Flynn (3.3%), Scullin (2.7%) and Macquarie (2.6%). Three suburbs recorded significant increases in population, these were Melba (7.9%), Belconnen Town Centre (4.4%) and Holt (0.9%). The increases in population can largely be attributed to the increase in development of medium density housing within these suburbs.
- In December 1994, the unemployment rate for Belconnen increased by 0.4 percentage points to 6.8 per cent, from December the previous year. Increases were recorded for all suburbs except Bruce. Belconnen Town Centre and Page. Bruce recorded a decrease of 0.5 percentage points. No change was recorded for Belconnen Town Centre and Page.
- During 1994, 586 buildings were approved for the Belconnen SSD to the value of \$76.2 million. The greatest number of approvals was recorded for Belconnen SSD Balance (94), which includes the new suburb of Dunlop.
- In February 1995, there were 16,390 enrolments for schools within the Belconnen SSD. Of these, 12,218 students (74.5%) had enrolled in government schools and the remaining 4,172 (25.5%) in non-government schools. Total enrolments decreased by 3.5 per cent from the previous year. The decrease was recorded in Government primary schools, down 380 (5.8%).

Statistical Divisions and Subdivisions
Australian Capital Territory
as at 30 June 1993

WODEN VALLEY STATISTICAL SUBDIVISION

- In 1994, Woden Valley, with 1,157.7 persons per square kilometre, was the most densely populated subdivision in the ACT. Within this subdivision, Farrer and Torrens formed the two highest densely populated suburbs, with 1,855.3 and 1,784.3 person per square kilometre, respectively.
- In December 1994, the unemployment rate for Woden Valley remained relative stable at 6.1 per cent, up 0.1 percentage points from December the previous year.
- During 1994, 252 buildings were approved for the Woden Valley SSD to the value of \$100.0 million. The greatest number of approvals were recorded for Curtin (47), Garren (33) and Farrer (30). A total of 331 dwellings were created during the same period. Of these, 297 (89.7%) were created in Phillip.
- The number of student enrolments remained relatively stable, with 3,870 enrolments at government schools and 2,462 enrolments at non-government schools.

Statistical Divisions and Subdivisions
Australian Capital Territory
as at 30 June 1993

TUGGERANONG STATISTICAL SUBDIVISION

- In 1994, Tuggeranong SSD population increased 2.9 per cent, from 84,500 to 86,956. Significant increases were recorded in Banks (48.8%), Conder (29.8%) and Gordon (29.1%).
- Tuggeranong SSD continued to have the highest proportion of 0-4 year olds (40.8%). Kambah, Calwell and Chisholm had the highest proportions, 14.4 per cent, 9.6 per cent and 9.4 per cent, respectively.
- Tuggeranong had the highest percentage of building approvals at 28.8%. The majority of building approvals granted to the Tuggeranong SSD were for the suburbs, Conder (18.2%), Kambah (15.0%) and Gordon (12.5%). Total value of building approvals was \$136.5 million.
- The highest proportion of students attending government and non-government schools lived in the Tuggeranong SSD, 34.6 per cent and 35.5 per cent, respectively. Of these students, most lived in Kambah (22.4%), followed by Wanniasa (12.2%), and Monash and Chisholm (both at 7.4%).

Statistical Divisions and Subdivisions
Australian Capital Territory
as at 30 June 1993

OUTER CANBERRA STATISTICAL SUBDIVISION

- In 1994, the population of Outer Canberra showed the strongest growth from 4,806 to 7,310 (52.1%). The increase can be attributed to an increase in the population of Palmerston (58.0%) and the establishment of the two new suburbs of Ngunnawal and Nicholls, which had populations of 815 and 251, respectively.
- Balance of Gungahlin (520) had the highest proportion of dwelling units created in the Outer Canberra SSD. It contributed 43.6 per cent of the overall activity of dwelling units created in this subdivision. Activity also commenced in the new suburbs of Ngunnawal and Nicholls, with 438 and 147 new dwelling units created, respectively.
- Outer Canberra SSD recorded the highest fall in the unemployment rate (2.7 percentage points) in December quarter 1994 from December quarter 1993. Symonston reported the highest unemployment rate of 12.7 per cent in the Outer Canberra SSD.
- The number of students living in the Outer Canberra SSD rose from 616 in 1993 to 1,124 in 1994; an increase of 82.5 per cent. Of these, 60.1 per cent lived in Palmerston.

Statistical Divisions and Subdivisions
Australian Capital Territory
as at 30 June 1993

ACT BALANCE STATISTICAL SUBDIVISION

- ACT Balance reported the highest rate of unemployment of all ACT subdivisions with 12.7 per cent in the December quarter 1994. This was an increase of 7.2 percentage points from the corresponding period of the previous year.
- The number of primary school students attending government schools in the ACT Balance subdivision dropped by 17.6 per cent in 1995 from the previous year. ACT Balance continues to account for 0.2 per cent of all primary school students attending government schools in the ACT.

FOOTNOTES

- (a) Source: 1991 Census of Population and Housing
- (b) Excludes rural areas.
- (c) Area as at 30 June 1994.
- (d) These figures are final data from the 1991 Census.
- (e) Not calculated due to new suburb or small size of initial population.
- (f) Includes occupied private dwellings, unoccupied private dwellings and occupied non-private dwellings (hotels, hospitals, etc).
- (g) Average annual rate of change is calculated using annual percentage changes from 1991 to 1994 inclusive. Caution should be used in the interpretation of these figures.
- (h) Separate figures for Palmerston unavailable. Balance of Gungahlin includes Palmerston.
- (i) Excess of births over deaths.
- (j) Source: Department of Employment, Education and Training. Care should be exercised in the interpretation of these figures, especially those SLAs which have labour forces less than 2,000 persons.
- (k) Source: Department of Urban Services.
- (l) Source: February 1995 ACT Public Preschool Census, ACT Department of Education and Training.
- (m) Source: Data File on ACT School Systems, February Update 1995, ACT Department of Education and Training. Figures for ACT Balance include Fairbairn and students not elsewhere classified.
- (n) See Explanatory notes, paragraph 49.

To avoid confusion, the letter 'p' has been excluded from the list of footnotes as it is used by the ABS to denote 'preliminary' figures.

EXPLANATORY NOTES

DEFINITION OF TERMS USED

Estimated Resident Population is the official population estimates series compiled according to the place of usual residence of the population.

2. The estimates of total persons in each statistical local area at 30 June 1993 are derived from estimates of the number of occupied dwellings and their occupancy ratios. For each suburb the number of occupied private dwellings is estimated by using domestic electricity connections and enumerations of the number of occupied dwellings supplied by A.C.T. Administration. Historical housing occupancy trends derived from census counts are used to estimate occupancy rates for dwellings. These are applied to the number of occupied private dwellings to give an estimated population for each suburb. Births and student numbers are also used as indicators of population size.

3. **ABS Business Register.** This information has been extracted from the ABS Business Register. The prime purpose of the Register is to provide a comprehensive source of business names and addresses from which selections can be made for inclusion in ABS economic censuses and surveys. The businesses on the Register are classified according to their industry and employment size. It is therefore possible to use the Register to derive statistical information.

4. The term *business* is used in a wide sense to include companies, sole proprietorships, partnerships, professional services, community services, government agencies and departments, religious bodies, etc. However, the ABS Business Register only includes those businesses that employ **wage and salary earners** and so businesses operated **entirely** by sole proprietors, partners and unpaid family members are excluded from this data.

5. In the case of businesses involved in agriculture, however, the ABS Business Register includes all those that have agricultural operations with an estimated value in excess of \$5,000 regardless of whether they employ wage and salary earners.

6. The term *Legal Organisation* defines the business' legal structure, i.e. sole proprietor, partnership or government authority.

7. The information most readily available from the ABS Business Register is counts of business units (either management units or locations) classified by industry, geographic area and employment size although counts can be classified by other data items as well. Unlike most other ABS data sources, the ABS Business Register does not produce a regular publication showing information at a detailed level. However, *Profiles of Australian Business, 1992* (Catalogue no. 1322.0) shows the type of information that can be produced, at a broad level, from the Register.

8. If you would like to use ABS Business Register data, please contact Information Services in any ABS Office,

or, alternatively, phone the ABS Business Register Section directly on (06) 252 5911.

9. **Tourist accommodation establishments** include establishments provide predominantly short-term accommodation (i.e. for periods of less than two months) to the general public, including:

- (a) *Hotels, motels and guest houses, with facilities* being establishments which provide a bath (or shower) and toilet in most guest rooms and have breakfast available for guests.
- (b) *Holiday flats and units* which are self-contained in terms of cooking, bath (or shower) and toilet facilities and do not have breakfast available for their guests; and
- (c) *Caravan parks* (short-term and long-term) available to the general public which have powered sites for caravans and toilet, shower and laundry facilities for guests.

10. The number of establishments and their capacity in the 1994 calendar year relate to establishments which operated at any time during this period or which were temporarily closed for seasonal reasons. The room and bed occupancy rates and takings from accommodation relate to establishments which operated at any time during 1994.

11. Hotels, motels and guest houses and caravan parks within the scope of the survey which operated for any part of the survey period, or which closed temporarily for seasonal reasons were counted in the *number of establishments*.

12. For holiday flats and units, the number of owners, managers or real estate agents within the scope of the survey who operated for any part of the survey period were included in the *number of letting entities*.

13. Capacity in terms of *Guest rooms, Bed spaces, Holiday units or Caravan park sites, etc* is the maximum number available to accommodate paying guests during the survey period. Capacity closed temporarily for seasonal reasons is included.

14. *Bed spaces.* Three-quarter beds are counted as one bed space; double beds as two bed spaces. Cots are excluded.

15. Occupancy rates represent occupancy expressed as a percentage of total capacity available during the survey period. - e.g

$$\text{Room occupancy rate (\%)} \text{ for the period} = \frac{\text{Room nights occupied}}{(\text{Guest rooms}) \times (\text{No. days in the period})} \times 100$$

16. *Takings from accommodation* refers to the revenue received from the provision of accommodation. Takings from meals are excluded.

17. **Statistical areas of the ACT** are classified as follows:

(a) *Statistical Local Areas* (SLAs) are the smallest types of spatial units in the Australian Standard Geographical Classification (ASGC) for which data shown in this publication are presented. They correspond in the majority of the cases to the suburbs of Canberra.

(b) *Statistical Subdivisions* (SSDs). These consist of one or more SLAs and form the intermediate size spatial unit for the presentation of regional data.

18. **Census.** This publication contains final data from the 1991 Census of Population and Housing. The counts are on a place-of-enumeration basis, which provides a count of people by their location on census night, 6 August 1991, which may not be where they usually live.

19. The purpose of the census was to count every person who spent census night in Australia. This included people in private dwellings, occupied non-private dwellings, camping out, on vessels in or between Australian ports and on board overnight transport. Diplomatic personnel and their families were excluded from the census, as were diplomatic residences.

20. Adjustments are randomly made to information obtained from the Census to protect the confidentiality of information about individuals. As a result, component cells may not add to their totals. These differences are statistically insignificant and do not impair the usefulness of the data.

21. *Dwellings* are classified as either private or non-private. Private dwellings are either occupied or unoccupied, and are further defined by structure (for example, separate house, townhouse, etc). Non-private dwellings include motels, gaols, welfare institutions, hospitals, retirement villages, boarding schools, etc. The total dwelling count includes private dwellings (occupied or unoccupied) and occupied non-private dwellings.

22. The publication series *Census Counts for Small Areas* (Catalogue no. 2730.1-8) include final 1991 Census data and 1986 Census data for each statistical local area. These data have been adjusted to allow for boundary changes which have taken place between the 1986 and 1991 Censuses.

23. **Vital Statistics.** *Births and Deaths* relate to all registrations of such events which occurred within Australia, irrespective of State of registration, where the usual residence was within the ACT. Births are allocated to a statistical local area of the territory according to the usual residence of the mother, and deaths are allocated according to the usual residence of the deceased (infant

deaths are generally assigned to the usual residence of the mother).

24. **Labour Market Estimates.** The information on unemployment rates contained in this publication was produced by the Department of Employment, Education and Training (DEET).

25. The ABS does not publish unemployment data from the monthly labour force surveys for areas below Labour Force Dissemination Region because of high sampling errors at this level of disaggregation. More accurate estimates for small labour markets, namely Local Government Areas (LGAs), or SLAs where appropriate, can be obtained by combining the information on unemployment beneficiaries (UB) from the Department of Social Security (DSS), which are not subject to sampling errors and are available at postcode level, and the labour force estimates at Labour Force Dissemination Region level.

26. DEET has implemented a procedure for deriving small area unemployment estimates, based on the Structure Preserving Estimation (SPREE) methodology. This procedure involves the following steps:

(a) The DSS data at postcode level are used to derive the number of beneficiaries in each LGA/SLA using postcode conversion weights.

(b) As the number of beneficiaries is generally lower than the number of unemployed persons, the SPREE procedure adjusts the UB numbers in each LGA/SLA to ensure that the total at Labour Force Dissemination Region level (by sex, marital status and age) is the same as from the monthly labour force surveys.

27. The reliability of these estimates compared with the census estimates has been found to vary with the size of the population in the LGA/SLA. Given the small size of SLAs in the ACT, these unemployment estimates should be treated with extreme caution. DEET advises that, wherever possible, it is preferable to use the estimates for the aggregated ACT regions, namely Canberra Central, Belconnen, Woden Valley, Weston Creek, Tuggeranong and Outer Canberra.

28. **Building Statistics.** The statistics were compiled on the basis of returns collected from builders and other individuals and organisations engaged in building activity. The survey consists of two components:

(a) A sample survey of private sector jobs involving new house construction or alterations and additions valued at \$10,000 or more to houses;

(b) A complete enumeration of jobs involving construction of new residential buildings other than private sector houses, all alterations and additions to residential buildings (other than private sector houses) with an approval value of

\$10,000 or more, and all non-residential building jobs with an approval value of \$50,000 or more.

29. A *building* is defined as a rigid, fixed and permanent structure which has a roof. Its intended purpose is primarily to house people, plant, machinery, vehicles, goods or livestock. An integral feature of a building's design, to satisfy its intended use, is the provision of regular access by persons.

30. A *dwelling unit* is defined as a self-contained suite of rooms, including cooking and bathing facilities and intended for *long-term* residential use. Units (whether self-contained or not) within buildings offering institutional care, such as hospitals, or temporary accommodation such as motels, hostels and holiday apartments, are not defined as dwelling units. The value of units of this type is included in the appropriate category of non-residential building.

31. **Road traffic Accidents.** Contains statistics of road traffic accidents which were reported to the police or other relevant authority in the ACT which meet the following conditions:

- (a) That the accident resulted in-
 - (i) the death of any person within a period of 30 days of the accident; or
 - (ii) personal injury to the extent that the injured person was admitted to hospital (particulars of injured persons who receive outpatient treatment at a hospital or who are detained in casualty for observation are excluded).
- (b) That the accident involved one or more road vehicles, which at the time of the accident were in motion, including motor cars, station wagons, utilities, panel vans, motor cycles, trucks, buses, pedal cycles (excluding tricycles normally used on footpaths), and ridden animals.

32. Where the accident occurred on an intersection with a number of suburbs the statistics have been allocated to the lowest alphabetical suburb.

33. The data for government and non-government schools contained in this publication were collected by the ACT Department of Education and Training.

34. A *school* is an establishment whose major activity is the provision of full-time day primary, secondary, college and/or special education.

35. *Government schools* are operated by the Department of Education and the Arts.

36. *Non-Government schools* are operated by non-government organisations that have been certified as 'efficient' by the ACT Minister for Education.

37. Schools have been classified into:

| | |
|-----------------|--|
| Pre-school: | commences at the age of 4 (as of 1st April) and lasts one year; |
| Primary school: | consisting of kindergarten to year 6, generally for children aged between 5 and 11; |
| High school: | consisting of year 7 to year 10, generally for children aged between 12 and 15; |
| College: | consisting of year 11 to year 12, generally for students aged between 16 and 17; and |
| Special school: | providing education for children with special needs, for example, schools for the physically or intellectually handicapped, or emotionally disturbed children. |

38. A *student* is a person enrolled or registered and active in a course of study at a school. All students, except those in special schools, have been classified by level of schooling (e.g. primary).

39. The *school* statistics by Statistical Local Areas are the location of the schools in the individual suburbs of the ACT.

40. *Home Suburbs Counts* are the number of students residing in each statistical local area who are attending school in the Australian Capital Territory.

RELATED PUBLICATIONS

41. This publication contains a selection of statistical series presented in related ABS publications together with some data supplied by the ACT Government Service.

42. Users may also wish to refer to other ABS products which give data on a small area level. These products are listed in the back of this publication. All current publications produced by the ABS are listed in the *Catalogue of Publications and Products* (1101.0). A *Release Advice* (1105.0) is issued on Tuesdays and Fridays which lists publications to be released in the next few days. These publications are available from any ABS office.

INFORMATION SERVICES

The ABS offers a variety of consultancy and information services which, in addition to its many printed and electronic publications and products, provide information and advice on a wide range of statistical needs. The consultancy services operates on a fee for service basis.

All ABS publications are available for reference from the library in the Belconnen Office of the ABS and through the ABS Library Extension Program (LEP) Libraries. The following are ACT LEP libraries:

- Australian National Library (Parkes)
- ACT Library Service — main holdings at Civic and Belconnen branches.
- Australian National University — Menzies Library (Acton)
- University of Canberra (Bruce)
- Australian Defence Force Academy Library (Campbell)
- ACT Legislative Assembly Library (Level 2, Legislative Assembly Building, London Circuit, Canberra City ACT 2601)
- TAFE libraries (located at all TAFE campuses — main holding at Reid Campus)

Please contact these libraries in the first instance.

The ABS also has a subscriptions service. Readers may subscribe to ABS publications and arrange to receive them on a regular basis. For more information concerning subscriptions, please phone 1800 020 608 or fax (03) 9615 7848.

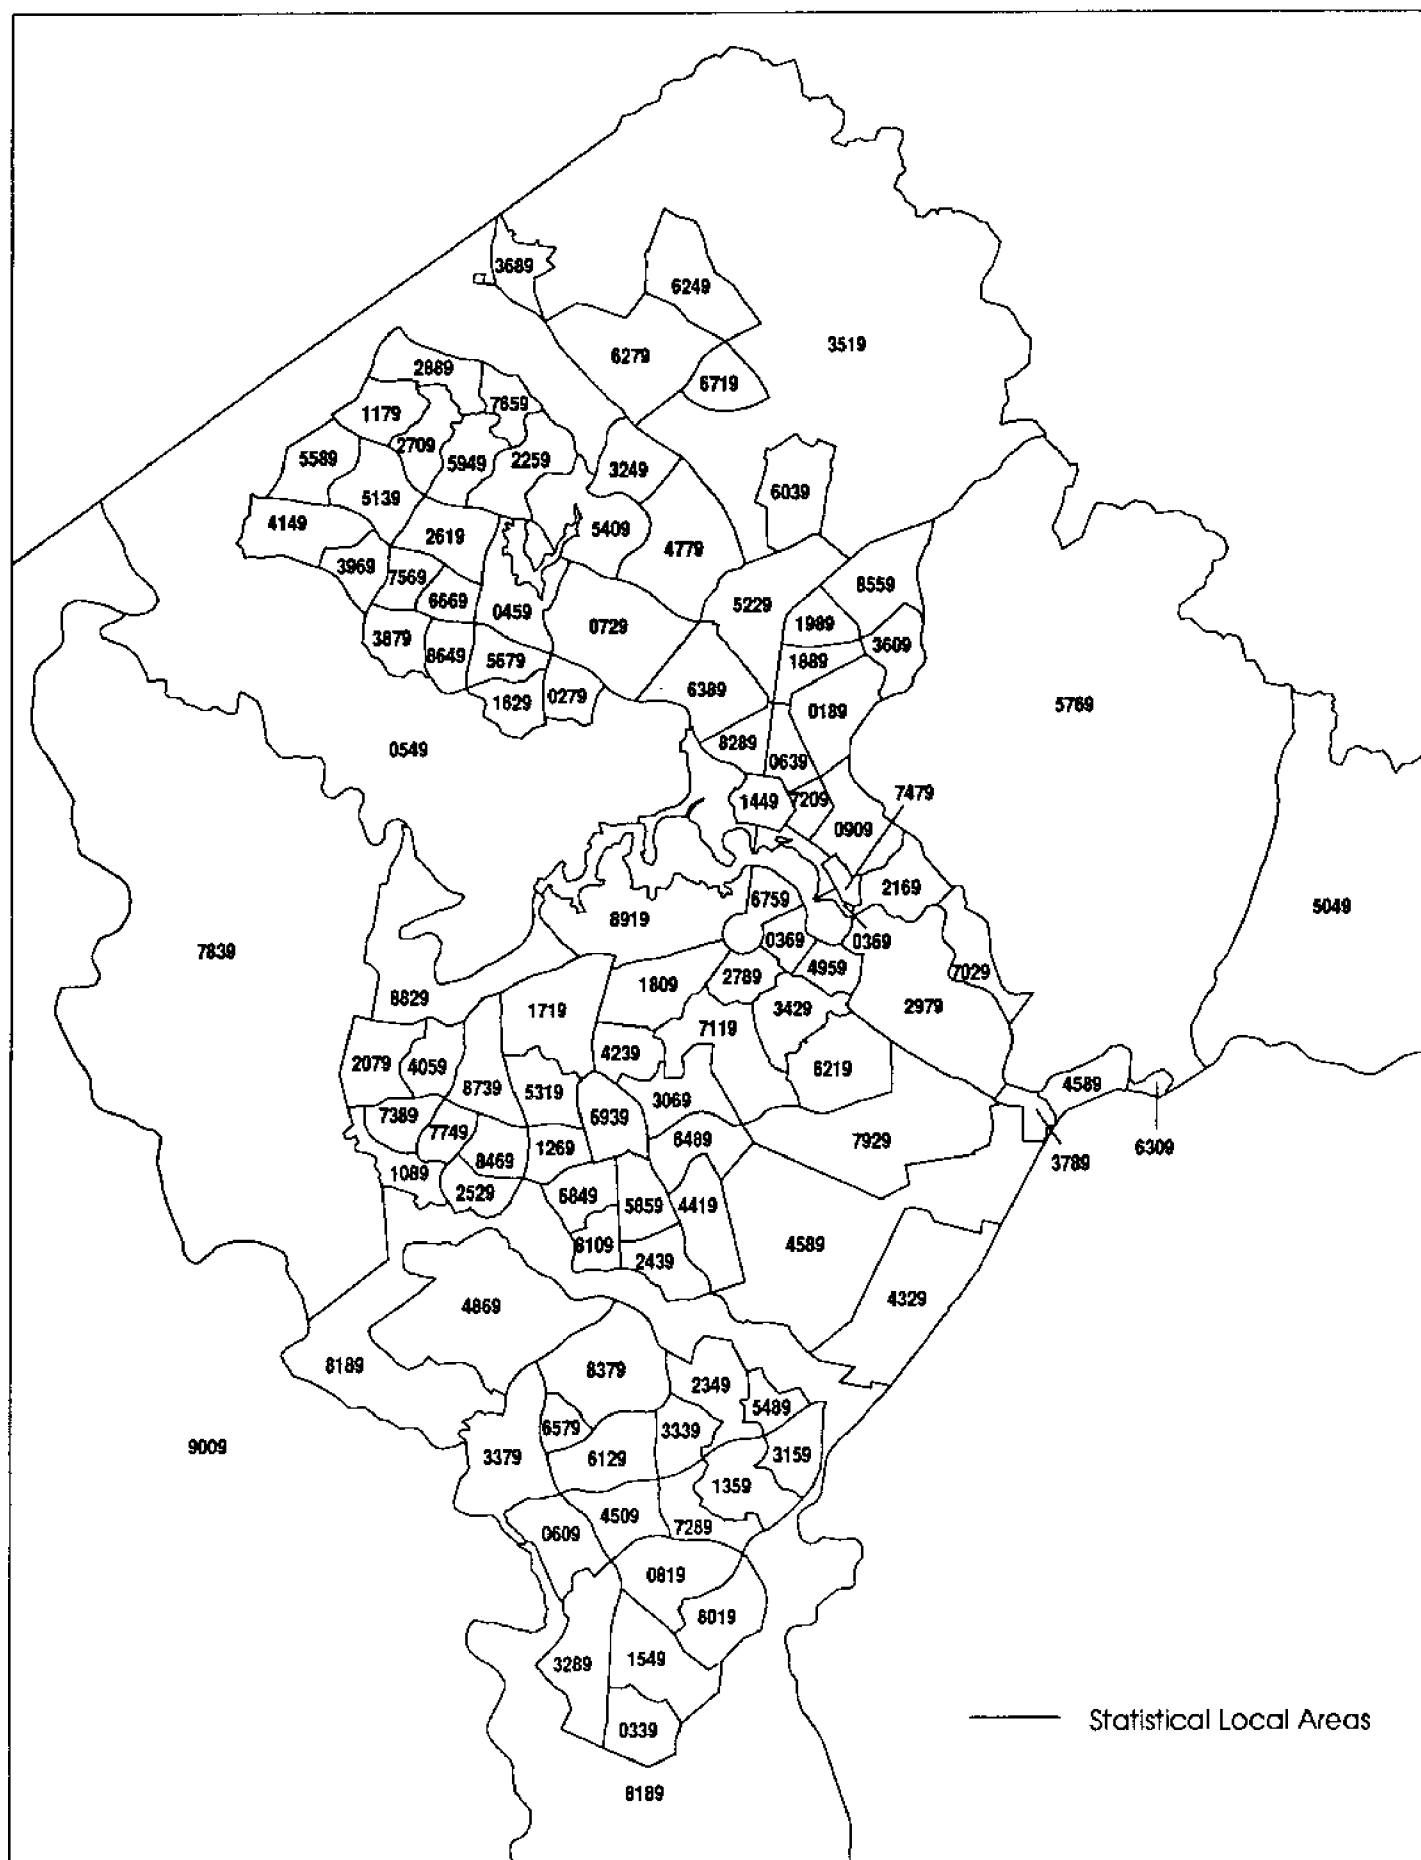

For more information about what the ABS offers:
